Documentation

Please use

<https://bimestriel.framapad.org/p/wg1wg4berlin2020> for notes during the meeting.

On <https://github.com/distantreading/WG1/blob/master/BerlinMeeting2020> we store these notes and the slides of our meeting.

Zoom meeting

- ▶ Link will be active 02/07/2020 and 03/07/2020
- ▶ Zoom installation at Humboldt-Universität zu Berlin (high privacy standard)
- ▶ During the meeting:
 - ▶ Use *hand up* or the *chat* to indicate that you would like to ask questions and give comments (Carolyn will moderate the session B+C)
 - ▶ In session D: Carolyn divide the group into smaller groups in separate rooms to foster a discussion about the services and prepare reports

1. Schedule and documentation

2. Meeting Goals

3. State of the play

Meeting Goals

- ▶ Updates on WG 1 and WG 4 issues
- ▶ Common dissemination strategy for ELTeC

Common dissemination strategy for ELTeC

- ▶ In addition to our working environment GITHUB and our archiving/referencing platform ZENODO, we discussed several possibilities to foster the visibility and accessibility of ELTeC in Malagá.¹
- ▶ Based on our findings in Malagá, we decided to have a closer look at two services for ELTeC: Textgrid and GAMS.
- ▶ Theses services can provide sustainable infrastructure and manpower to support us.
- ▶ Goal of this meeting:
 - ▶ Explore and tests these services with ELTeC data (Session B+C).
 - ▶ Evaluation and reports (Session D)
 - ▶ Decision on what we will definitely do in the Action + Definition of responsibilities (who) and deadlines (when) (Session E)

Further dissemination strategy for ELTeC

- ▶ This meeting does not mean that any other initiative to disseminate ELTeC is unwelcome!
 - ▶ Let WG4 know, what you have achieved!
 - ▶ For example: Carolin will publish the last version of ELTeC (of GP4) in 2021 on LAUDATIO-Repository
<https://www.laudatio-repository.org/>
- ▶ However, it is important to have a sustainable dissemination strategy that we follow in any case in GP4. In Malagá, we decided to have a closer look at GAMS and Textgrid. These services have interesting features, are maintained outside the COST Action and can support us in providing sustainable services after our Action's end which is crucial to not lose our findings.

1. Schedule and documentation

2. Meeting Goals

3. State of the play

WG1 and ELTeC in GP 4

- ▶ Add novels on existing collections and start new ones, data curation
 - ▶ Overview on ELTeC Language Collections:
<https://distantreading.github.io/ELTeC/index.html>
- ▶ Next ELTeC release on Zenodo 30/11/2020
- ▶ TS in second half of 2020
- ▶ Encoding schema level 2
- ▶ Dissemination strategy for ELTeC (start today!)

WG1 and ELTeC in GP 4

- ▶ Change in WG leadership
- ▶ Carolin will be on parental leave between 08/2020 and 04/2021
- ▶ Martina Scholger will support WG1 as a third co-lead – Thanks a lot! :-)
- ▶ Three co-leads in WG1: Lou, Borja and Martina

WG4 in GP 4
